ЛАБОРАТОРНА РОБОТА № 2
ВАРІАНТ № 5

ЛЬВІВ 2025

ЗАВДАННЯ:

2. Advanced landing

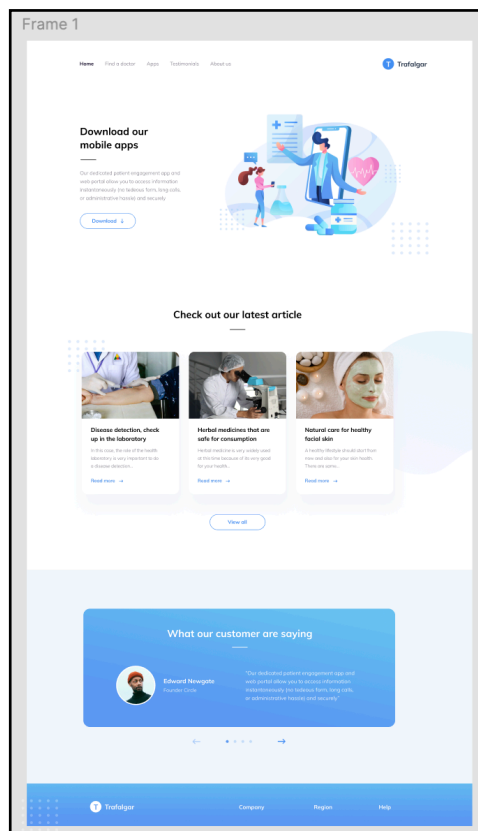

Description: Improve a landing page following the given design (same as previous) by adding full responsiveness and some animation.

Requirements:

- The website should be **partly responsive**:
Required: for **320px** (iPhone 5s) **2560px** (4K screens).
***Hint:** for extra-large screen width, you can just fit website content inside a previously set container for the regular screen width and centre it horizontally.*
- The header should collapse to a **hamburger** on small screens
- The website must contain **animations (at least 3)**. Can be made in any possible way, preferably with css properties (*animation/transition*).
- Your project should be **logically structured** (all your CSS can't be in just one-two files)
- All of the **previous work requirements** must be kept.

P.S If your semester project has a landing website that **satisfies the requirements**, then you could skip this work by bringing your website for an assessment.
